

# Vulnerability Scanning Cluster CITES Security Brownbag

Warren Raquel  
CITES Security  
April 12th, 2005

# Vulnerability Scanning Cluster

- Replaces Internet Security Scanner (ISS)
- 8+ nodes systems performing parallel scans
- Nessus based
- Scheduled scans
- Privileges provisioned by Contact Manager
- Features are up to you....

# Nessus

- Network based vulnerability scanner
- Remote and Local checks
- Nearly 6,000 vulnerability signatures
- NASL allows UIUC specific scripts

# VSC Development

- Ready for initial testing April 25th
- Initial Options:
  - Simple Signature Groups
  - Scheduled Weekly Scans
  - Emailed/Bluestemed Reports

# VSC Future

- Shaped by admins
- What features do you want?
  - What do you **NEED** for version 1?
  - What do you want for later versions?

# Questions/Discussion
